

Kris Mohan

Kris Mohan worked for Atomic Energy of Canada in various increasingly more responsible positions in technical and commercial capacities for over 27 years. Among his many roles, he was also responsible for training foreign clients before they started nuclear programs in their home countries. In his last role, he was the Manager of Proposals for nuclear reactor services work around the world which generated approx. \$400 million/year in sales. His technical and management contribution was acknowledged by many learned organizations.

He was also responsible for organizing various CNS conferences related to global warming and helping Canada meet its Kyoto obligations.

Mr. Mohan received a Bachelor of Engineering (B.Eng.) from McMaster University, Hamilton, Ontario and a Master of Business (MBA) from McGill University, Montreal.

He is the Chair of the International Liaison Committee in CNS.

He is a registered Professional Engineer in Ontario and active in several technical organizations.
